

Abstraction: London Underground Map

(Answers)

Name: _____

Class: _____

Abstraction is where you focus on the important details in a problem only. Take the London underground map. Here is the official London underground map.

The official London underground map is a simplified version of what the underground actually looks like.

If the map was more similar to reality, it would look as follows:

What do people use the official London underground map for?

To help them navigate through the underground to get to the correct destination. They know which line to take and how many stops there are before they need to get off the train.

What details are missing from the official London underground map?

The twists and turns of the tracks are missing as they are not important when you are underground. Also, any above ground features are missing such as the location of parks etc.

Why do you think the official London underground map has been simplified?

To make it easier to read
