

Abstraction: Gathering Important Facts

(Answers)

Name:

Class:

Read the following statement and then answer the questions below:

"Well, I was walking down the road, not this road, you know the road next to the gym. My brother likes to go to that gym, he's really into his keep fit, and watches what he eats too. He wants to be a personal trainer so it seems like he is always in the gym these days. Well, I was going down there the other night, I think it was Tuesday, or maybe it was Thursday. I know it wasn't Wednesday because I was out with my mate, Emma and we went to the cinema to watch the new Spiderman film. It was really good, I love an action movie. Anyway, I was walking down the road, you know, next to the gym. And that's when I saw it. It was just tied to the lamppost. It was so cold, it was trembling poor thing. I looked around but it looked like nobody owned it. How could anybody leave an animal tied up like that, with no food or water? I untied it and it was so excited it was wagging its tail all the way back to my house. And when we got home it was barking and running around in circles in excitement."

What did they find?

They found a dog.

How do you know what they found?

The animal was barking and wagging its tail, two classic dog behaviours.

How many siblings do they have? And how do you know this is correct?

We don't know, they have at least one brother, but we don't know if they have more brothers or sisters. They do not give us enough information.

Write three more questions you could ask to find out more about the IMPORTANT facts about the story.

1. These answers will be personal to the student, but they should all be related to finding the dog and not any other details of the story.
2. These answers will be personal to the student, but they should all be related to finding the dog and not any other details of the story.
3. These answers will be personal to the student, but they should all be related to finding the dog and not any other details of the story.
