

Reducing Risks (Answers)

Name:

Class:

Describe how you can reduce the risks of the following dangers.

Danger	How can you reduce the risk?
Staff accessing data they should have no right to see	Make sure the access rights are set up correctly so only relevant staff can see the data they should
Staff losing a USB with confidential private data	Disable the USB ports or make sure the data that is on there is encrypted and needs a password to open
A virus that deletes files on your computer system	Update the antivirus software regularly and include a firewall to stop incoming threats
Cybercriminals finding a way into your network as you are using an old version of the operating system	Update the software to the latest versions and install the patches as soon as possible
Cybercriminals gaining entry to your computer network as some of your staff are using "password" as their password	Make sure staff are using strong passwords including upper and lower case, numbers and symbols and include at least 8 characters. Force them to update them regularly
